This article will probably make a lot of people angry, but it must be written anyway.

H.G. Johnson born on border of New Mexico and Oklahoma 1933 died in Kern County 1988 buried in Lamont, California Graveyard.. ½ Native American by Blood

H.G. Johnson born on border of New Mexico and Oklahoma 1933 died in Kern County 1988 buried in Lamont, California Graveyard.. ½ Native American by Blood

Who has the most Apache percentage today as of the year 2026 ?

Only about 3 people in the world left out of the recorded Apaches (Apaches only lived in what is now known as the South West U.S.) who are alive today as of the

year 2026 are about 1/4th Apache Native American. 1/4th Apache Native American is equivalent to 25% of the whole person and a whole person is equal to 100%. Everyone else alive today who are part Apache of some kind are 1/8th Apache or less.. this is equivalent to 12.5% of the whole person and a whole person in 100%. Most people who were actually part Apache Native American by blood who were born in New Mexico in the 1910s, 1920s, 1930s and the 1940s have more pure Apache descent than everyone else in New

Eye Color: Green Hazel and Blue Hazel

Why is Hazel Eye Color The Most Rare Eye Color in The World?

* Natural Rarer Hazel Eye Color are a sign of genetic inheritance from The American South-West, The American Desert Areas, The American Indian / The American Indigenous, often times the European Spanish and the European Western-Scandinavian. Hazel eye color can appear brown, blue, green, gold, silver or other colors in different lighting conditions. Blue eye color is actually the most common eye color in the European world as well as the most common eye color in the United States collectively. Blue eye color is actually more common world-wide than light brown eye color or green eye color, especially in European ethnic groups. Natural Hazel eye color is the rarest eye color in the world. Source: Internationally Collected Demographics and Statistics On Population Groups.

Eye - Left - Hazel - Forward View

Mexico because those are the ones that left New Mexico and mixed blood with Whites and didn't die. The ones that stayed got wiped out by the Mexican Spanish Speakers from the 1890s to the 1940s. The Mexican Spanish speakers killed most Apaches in New Mexico up until about the 1890s. The rest of the Apaches went to war with the U.S. Army and the Mexican Spanish speakers up until about the 1960s in New Mexico. After the 1970s most Apaches were given lots of land

all over New Mexico. The real Native American Reservations are actually little pieces of land across all of New Mexico. All of the Apache Tribes in New Mexico lie about their true history because all of the big "Reservation Lands" in New Mexico for the Apaches were not acquired until after the 1970s in New Mexico. My maternal grandfather was about 1/4th Apache Native American who was born in 1933 in what became Carlsbad, Eddy County, New Mexico after the 1950s and he died in 2002 in Carlsbad, Eddy County, New Mexico. My paternal grandfather was about 1/2 Native American born in 1933 in the areas that are now known as the border of New Mexico and Oklahoma.. he traveled to Kern County, California in the Oklahoma Dust Bowl where all of the Dust Bowl Migrants lived at in Lamont, Kern County, California. Today there is innumerable fraud

H.G. Johnson born on border of New Mexico and Oklahoma 1933 died in Kern County 1988 buried in Lamont, California Graveyard.. ½ Native American by Blood

involving Dust Bowl migrants. No one from outside of Oklahoma migrated to Kern County in the Oklahoma Dust Bowl because the Oklahoma Dust Bowl only affected the Oklahoma Panhandle area and nowhere else except for in some areas in Oklahoma in the 1930s and the 1940s. Not many people alive today actually have real Native American ancestry by blood from these areas mentioned, including almost all of the people descended from peoples of Mexico. Almost all of the people who were born in the areas that were unified as Mexico up until the 1920s only have ancestry from the Mehican / Mehican Native Americans which was the biggest group of Native Americans in Mexico. The Native Americans north of the areas that are now known as Mexico were mostly wiped out by the Whites all the way up to the 1960s and the 1970s.

Apache is an authentic Native American word that actually means "Enemy"... Other people who were not Apache would say "Be careful of the "Apaches or in Spanish "Fear The Apache"" when they saw the Apaches come to kill them.. which meant "Be careful of the enemies / Fear the enemies" when they had horses and spears and knives.

Verified Native Americans In My Immediate Ancestry

* H.G. Johnson (my paternal grandfather by blood) who was 1/2 Native American (50%) by blood 1933 - 1988 (Born in New Mexico, Oklahoma border ... buried in graveyard Lamont, California).. his mom was 1 whole Native American born near the river on the border of what is now New Mexico and the southern part of Oklahoma.. she was probably raped by a white man with the name Johnson from the nearby settlement... adopted

* Clyde Glass (my maternal grandfather by marriage) who was 1 whole Native American (100%) by blood probably with Apache born between 1920s and 1940s – died 1980s (born in New Mexico... probably died in Kern County somewhere in the 1980s)

* Dale Eugene Edwards (my maternal grandfather by blood) who was about approximately 1/4th (25%) Native American by blood with Apache 1933 - 2002 (Born in South New Mexico by Mexico ... buried in graveyard in South New Mexico by Mexico)

Harvey Johnson and wife born on border of New Mexico and Oklahoma 1933 died in Kern County 1988 buried in Lamont, California Graveyard.. ½ Native American by Blood

Unverified

* Margaret Hood who was an unknown amount of percentage Native American by blood (Missouri)

* Georgia Hiawatha Jennings who was an unknown amount of percentage Native American by blood (Oklahoma, Missouri)

By using a few authentic Native American words passed down to me and also authentic Native American information passed down to me from my great grandparents to my grandparents to me in the 1990s and the early 2000s I can prove wrong 99% of U.S.

Government History, 99% of the Native American History within the United States, Mexico and South America and I can show what Native American Tribes are real and which ones are fake... one of my Grandfathers was more than likely 1/2 Native American born in what became known as Oklahoma Indian Territory in the 1930s and the other one was born in what became known as New Mexico in the 1930s.. based on the real pictures of them and the locations that they were born in I can prove that everyone today is a liar. If anyone were born in New Mexico in the 1930s or before and in certain areas of Oklahoma in the 1930s and before it is impossible that they did not have some kind of Native American ancestry. This is because of what kind of people lived in these areas during and before this decade. This information can also be used to prove that Whites were not living in these areas yet and it can be used to prove that every area within the U.S. creates phony

histories about themselves and each county itself creates its own phony history about when it was founded and created. This information can also be used by future descendants to figure out the truth about the real Native Americans. Not all real histories or ways of life of the real Native Americans will be mentioned here. I did have to start dying my hair black again because it started going grey in my late 30s... but my hair is naturally black anyway.

This article will be placed into the Arctic World Archive so that in the future everyone everywhere can dispel the myths of Native Americans and so that everyone will

know who the real Native Americans are now and who the real Native Americans were historically. This information needs to be put online so that in the future people can easily see through the fabricated history that was written about America and the fabricated history that was written about Native Americans from area to area within the lands that are now known as "America".

In this article I will prove wrong the entire system in place about Native Americans and Whites and I will prove that all of the Native American Nations and Native American Governments in Oklahoma and in anywhere else in the country are completely fake. The only real Native Americans left live in the lands that are now known as California, Nevada, Arizona and New Mexico and the countries of Mexico and South America. Most populations in all other areas outside of the lands that are now known as California, Nevada, Arizona and New Mexico and the countries of Mexico and South America are not Native American or could possibly have partial Native American ancestry, but that is highly unlikely due to the sad reality of how even White people had to travel along the rivers on horses and in ships to find new areas to build the first towns from area to area. If the rivers don't connect, you can't get there by foot or on horse or by a ship. If there are no roads to drive on in a vehicle, you can't get there, even today. Vehicles were not in circulation until the 1930s. If there are no cleared dirt roads to travel on by riding a horse, you can't get there. Even if you are on foot or on a horse you can only go so far away from a river before you die (usually between 20 and 40 miles) even today and this is because there is no water anywhere else except for in a river and rivers only lead to certain livable areas and they only lead up to the source of the river which is an area that is usually too cold to live in and this cold area leads to death because it is too cold there and you can't start a fire there.

If it snows or rains in any area the snow and the rain makes all of the leaves, twigs and wood in the area wet.. if those things are wet then you cannot use it to start a fire and you die from lack

of warmth... if it is snowing then there are no animals because the animals have already left in the summer time to places where it does not drop to less than 20 degrees fahrenheit in the winter time, usually. This is called migration of different kinds of animals.. the animals always stay in the areas that are warm enough to live in and survive and only in the places where they can drink water every day. If it snows and freezes in any area then the water also freezes and if the water also freezes an animal and a human being cannot drink it because it is frozen and a human being also can't start a fire there to melt the frozen water either because everything that is burnable in the area is wet.

All of the videos on the Internet about Native American Tribes in different areas are completely fake, even today. There were no Native Americans living anywhere in what is now known as the United States outside of what is now known as New Mexico, Tennessee, Arizona, Nevada, Southern California.. this is because it gets too cold in every other area such as in the areas that are now known as Ohio, Michigan, New York, etc. in the winter time there and everything there freezes over including the lakes and the rivers. Again, if it snows anywhere.. you die. This is because you can't start a fire there because everything in the area gets wet. If you can't start a fire then you die because you cannot survive the winter.. you cannot bathe in the winter in these places and you would not have anything to eat either. Go try it with nothing except a stone knife in the summer time and build up an advance house made of wood and bricks from the materials in the area.. even go so far as to collect wood and leaves to save for the 3 - 4 months of winter time in that area where it snows and use the collected leaves and wood to burn inside of the house that you built in the winter time while it snows.. it will not work for long and you will run out food and all of the materials inside of the house get wet and damp either either way... there won't be anything to drink.. and then you die. Native Americans ONLY HAD STONE TOOLS. THEY DIDN'T HAVE ANYTHING ELSE. THINK ABOUT IT. THERE IS NO SUCH THING AS FLINT ROCKS ON A RIVER... YOU WILL NEVER FIND NATURAL FLINT ROCKS ON ANY RIVER ANYWHERE IN THE UNITED STATES... IT DOESN'T EXIST... THOSE ARE MAN MADE AND THAT IS NOT WHAT NATIVE AMERICANS USED TO START FIRES... THE POWER OF FIRE WAS A SECRET PASSED DOWN TO NATIVE AMERICANS.. YOU CANNOT START A FIRE BY RUBBING YOUR HANDS TOGETHER WITH A TWIG. IT DOESN'T WORK.. GO TRY IT.. GO ASK AN EXPERT TO TEACH YOU.. YOU WON'T FIND ONE.. IT DOESN'T WORK.. IT DOESN'T MATTER WHAT YOU SAY OR DO.. GO TRY IT. IT DOESN'T WORK. YOU ARE A DELUSIONAL LIAR. IT DOESN'T MATTER WHAT VIDEOS YOU WATCH ON YOUTUBE OR ANYWHERE ELSE... NONE OF IT WORKS. IT IS ALL FRAUD CREATED BY FRAUDSTERS. YOU CANNOT START A FIRE USING WOOD TWISTING TECHNIQUES EITHER. GO TRY IT. IT DOES NOT WORK. ALL OF THE VIDEOS ON THIS ARE FRAUD. WOOD NEAR RIVERS CANNOT BE USED TO START A FIRE BY USING TWISTING TECHNIQUES NO MATTER HOW MUCH

YOU DRY IT OUT AND YOU HAVE TO STAY BY A RIVER IN ORDER TO CONTINUE LIVING BECAUSE IF YOU GO TOO FAR FROM ONE, YOU DIE BECAUSE THERE IS NOTHING ELSE TO DRINK.

All of the pictures of the Native Americans presented by White historians are fake and are actually White people in the 1950s who are dressed up as Native Americans and some of these White people are wearing silicone masks to look like Native Americans in the pictures, but they are not Native Americans.. they are White people. Zoom in on the black and white pictures of Native Americans on the Internet... you will find that it is actually White people dressed up as Native Americans in the 1950s and afterwards.. and some of them are wearing silicone masks.. you can even see the silicone end at the arms by the wrists.

The U.S. Government is smart.. they defrauded and killed Native Americans everywhere they built their towns... they wrote entirely fabricated histories about Native Americans and about themselves decade after decade while they killed the Native Americans.. If the person were born in the areas that are now known as Oklahoma in the 1940s or before this year there was absolutely no record of the birth, even if you were White... unless you had a farm and you had a family bible.. all family bibles are fake because they could not have been printed or transported to towns where Whites settled in Oklahoma from outside of Oklahoma or even inside of Oklahoma until after the 1950s because they did not have the technologies or the papers required to make them yet... and most papers fell apart after about 5 - 10 years and the inks are also fake and don't match the time period that they claim because the inks had to have come from somewhere else and they didn't have the materials in those areas in Oklahoma for making ink either. You need a paper mill to create paper and for creating paper you need trees and in order to cut down trees you need metal axes and metal tools to do it.. you also need the means to transport the tree blocks to the paper mill.. you cannot pickup a tree block even if you have 10 people.. you cannot transport a tree block with a horse and a carriage.. it is too heavy to move... vehicles were not invented and introduced into Oklahoma in the 1930s and the 1940s.. and those vehicles did not have the means to move the tree blocks to a papermill. Only the vehicles after the 1950s and the 1960s could do that. Therefore Oklahoma did not have paper until after the 1950s and the 1960s and neither did anywhere else in the "United States". What does this mean ? This means that all of the fraudulent history about each area within the "United States" was created and written down from area to area after the 1950s... especially about Native Americans... Why ? Because they DID NOT HAVE PAPER AND INK YET. If the White people were not there yet, then it is impossible that they named the area yet and it is also impossible that any county existed... which means that every county lies about it's history. All education was restricted to doctors... no one was educated in any way shape or form... all

information was passed down from generation to generation. No one knew how to read or to write. If they did not know how to do that... then they could not have written anything down anyway.

They also created phony genealogies and phony pictures for Native Americans later on after the real invention date of the black and white camera and this is because if you were a Native American born in the lands that are now known as Oklahoma in the 1930s or before then you did not have any documentation of the birth and the parents were not documented either... Native Americans did not write down the names of their parents because they lived on the rivers in small settlements that they built out of the natural things that were in the area by the rivers... this is where they lived and where they fished for food, drank water out of the river, bathed in the river and captured animals to eat and they grew specific kinds of crops near the rivers. Why ? Because a human being cannot leave a river because if they do then they die because there is absolutely NOTHING else out there away from a river... even today. Take a good long look at the satellite images of the United States... anywhere there is a river... there is a settlement and NO WHERE ELSE BECAUSE THAT IS WHERE THE WATER IS AT... ALL OF THE ANIMALS GO TO THE RIVERS TO DRINK WATER... THEY DON'T DIG INTO THE GROUND TO GET WATER BECAUSE THEY CAN'T. They did not have writing tools and they did not have paper to write anything down onto.. any authentic Native American artefacts recovered would be made of stone AND NOTHING ELSE.

If the person were born in the areas that are now known as New Mexico and Oklahoma in the 1930s or before that there was absolutely no record of the birth and there still isn't, but if there is a record now then it is completely fraudulent and I'll show you why. All White people had little pieces of land as they slowly settled them from area to area along the rivers in the lands that are now known as Oklahoma ***AFTER THE 1880s, BECAUSE BEFORE THE 1880s THE WHITE PEOPLE WEREN'T THERE YET***. ***THE WHITE PEOPLE WERE ONLY ON THE BORDERS OF WHAT THEY CALLED INDIAN TERRITORY TO TENNESSEE*** Genealogies even today is also completely fake because it is impossible that they recorded and matched names back then and pictures claiming to be taken before the 1940s and the 1950s in most areas within what is now known as the entire United States are also fake because of the availability of the kinds of cameras during this time and they were not available. Any black and white pictures today claiming to be taken before the 1950s are completely fake because it is impossible that they had a black and white camera in circulation ANYWHERE BEFORE THE 1950s - 1970s.

All Native Americans were born along the rivers up until the 1880s - 1930s EVERYWHERE WITHIN WHAT IS NOW KNOWN AS THE UNITED STATES because that's where they all lived before the 1880s - 1930s. Why ? Because it's impossible to live anywhere else even if you're White. Take a good long look at the satellite images of the United States from area to area... all cities and all settlements even today are near rivers. Why ? Because it's impossible to live anywhere else. Why ? Because there is NO FUCKING WATER ANYWHERE ELSE EXCEPT FOR BY RIVERS, EVEN IN THE GROUND IN MOST PLACES. IT MIGHT BE GREEN FAR AWAY FROM A RIVER, BUT IT IS GREEN BECAUSE THE RAIN FALLS ON IT... OR BECAUSE THE GREEN TREES DRAW THE WATER DEEP OUT OF THE GROUND... WHERE THERE ARE GREEN TREES FAR AWAY FROM A RIVER THERE IS WATER IN THE GROUND... IN THE DESERT WHERE THERE ARE NO TREES THERE IS NO WATER, NOT EVEN IN THE GROUND AND IT ONLY GROWS BECAUSE OF THE RAIN THAT HITS IT.

WHEN YOU TRAVEL INTO THE WILDERNESS TO FIND AN AREA TO BUILD A NEW TOWN YOU MUST FOLLOW THE RIVER TO GET THERE BECAUSE THERE IS NO WATER TO DRINK ANYWHERE ELSE. ONCE YOU FIND AN AREA ALONG THE RIVER BY EITHER WALKING IT ON FOOT OR ON HORSEBACK IT MUST BE AN AREA WHERE YOU CAN LIVE THERE IN THE WINTER TIME AND WHERE IT DOES NOT SNOW.. THESE ARE THE AREAS WHERE THERE ARE ANIMALS TO CAPTURE AND TO EAT AND WATER TO DRINK EVERY DAY. EVERY HUMAN BEING WILL DIE IF THAT HUMAN BEING DOES NOT EAT FOOD AND DRINK WATER EVERY DAY. THINK ABOUT IT. ONCE A TOWN IS SLOWLY BUILT UP DAY BY DAY, MONTH BY MONTH AND YEAR BY YEAR BY WORKERS WHO BUILD THE TOWN AND WHO BUILD THE HOUSES IN THE TOWN FROM THE WOOD IN THE AREA, YOU CAN THEN PROCEED TO TRAVEL FURTHER OUT FROM THE RIVER TO DIG INTO THE GROUND TO GET WELL WATER TO THEN STAY IN THAT AREA TO BUILD A NEW TOWN FROM ALL OF THE STUFF IN THE AREA.. SLOWLY. BUT FOOD MUST BE TRANSPORTED FROM THE PREVIOUS AREA TO THE PEOPLE IN THE NEW AREA WHO SLOWLY BUILD IT BECAUSE THEY WILL DIE IF THEY DON'T EAT FOOD AND DRINK WATER.. NOTHING ELSE WAS AVAILABLE DURING THESE TIMES EXCEPT FOR WATER... USUALLY FROM THE TOWN CLOSE TO THE RIVER.. BECAUSE THAT IS WHERE THE FUCKING FOOD AND WATER IS AT. IF YOU MOVE ANIMALS AWAY FROM A RIVER THEY WON'T HAVE ANYTHING TO DRINK UNLESS YOU HAVE WALKED 20 MILES AWAY FROM A RIVER AND DUG INTO THE GROUND TO GET WELL WATER.. AND IF YOU DO THAT EVEN BY HORSEBACK YOU WON'T HAVE ANYTHING TO EAT OR DRINK WHILE YOU DIG THE WELL... IT TAKES DAYS TO MONTHS TO DIG A FUCKING WELL. AFTER THAT POINT IN TIME YOU CAN THEN BRING THE ANIMALS TO THE NEW AREA WHERE YOU HAVE DUG INTO THE GROUND TO GET WELL WATER. THEN THEY CAN DRINK THE WELL WATER AND YOU CAN FEED THEM FOOD, BUT YOU HAVE TO BRING FOOD BACK TO THEM TO FEED THEM EVERY DAY.. THIS ALSO TAKES A LOT OF ENERGY.. BY HORSEBACK UP TO 40 MILES PER DAY AND ON FOOT ONLY UP TO 21 MILES PER

DAY.. THIS TAKES 6 HOURS OF WALKING. IF NOT THEN THEY (THE ANIMALS) ALL DIE AND SO DO YOU.. EVENTUALLY.. EVEN IF YOU SLAUGHTER THE ANIMAL AND EAT THE MEAT... WHY ? BECAUSE THERE IS NOTHING ELSE TO EAT IN THE FUCKING AREA AND YOU CAN'T STAY THERE. IF YOU TRAVEL TO AN AREA WHERE THERE IS NO RIVER IT IS WILDNERNESS AND IF IT IS WILDERNESS THEN THERE IS NOTHING TO FUCKING EAT OR DRINK AND THEN YOU DIE BECAUSE IF YOU DO NOT EAT FOOD AND DRINK WATER EVERY DAY YOU WILL DIE. IF YOU ONLY DRINK WATER AND DO NOT EAT ANY FOOD FOR UP TO 7 DAYS YOU WILL FUCKING DIE. YOUR BODY BECOMES WEAK AFTER 3 - 5 DAYS OF ONLY DRINKING WATER AND NOT EATING FOOD AND YOU CAN'T MOVE. IF YOU CAN'T MOVE THEN YOU CAN'T WALK OR TRAVEL ANYWHERE ELSE AND YOU DIE RIGHT THERE BECAUSE YOUR BODY WILL NOT HAVE THE ENERGY TO WALK ANYWHERE OR TO WALK TO A PLACE TO GET ANYTHING TO EAT OR TO DRINK.. THINK ABOUT IT.

People get confused when doing genealogy research because they don't know real history and they are not mentally based in reality. People always look to try to match up records from parent to parent but what they might finally realize is that if the person were born in the areas of what is now known as Oklahoma before the 1940s there was absolutely no record of the birth.. if there is no record of the birth then the parents WERE NOT DOCUMENTED AND IT IS IMPOSSIBLE TO KNOW WHO THE PARENTS ARE BECAUSE IT IS NOT ON RECORD ANYWHERE NOT EVEN IN ANOTHER PLACE SUCH AS WHAT IS NOW KNOWN AS ANOTHER U.S. STATE, AND I WILL SHOW YOU WHY.. BECAUSE THERE WAS NO FUCKING PAPER OR INK ANYWHERE UNTIL AFTER THE 1960s. IF THE GRANDPARENTS DON'T PASS DOWN THE NAMES AND INFORMATION OF THEIR PARENTS TO THE CHILDREN THEN IT IS IMPOSSIBLE TO KNOW THE NAMES AND THE INFORMATION BECAUSE ALL PAPER RECORDS IN OKLAHOMA WERE CREATED AFTER THE 1940s AND ALSO AFTER THE 1960s AND ONLY IN SOME AREAS. WHY ? BECAUSE THEY DIDN'T HAVE PAPERS OR PENS OR INKS OR A PLACE TO STORE THE FUCKING RECORDS ANYWHERE BECAUSE IT WAS NOT ORGANIZED INTO A FUCKING STATEHOOD YET AND THEY DID NOT HAVE VEHICLES TO TRANSPORT FALLEN TREES TO A PAPERMILL TO CREATE PAPER TO THEN WRITE DOWN INFORMATION ONTO IT TO THEN STORE RECORDS OF BIRTHS ANYWHERE, THINK ABOUT IT. THE VEHICLES WERE NOT IN CIRCULATION IN OKLAHOMA UNTIL THE 1930s... AND THEY DID NOT HAVE TRUCKS OR THE MEANS TO TRANSPORT CHOPPED TREES OR TREE BLOCKS THAT THEY CUT DOWN TO THEN LOAD ONTO TRUCKS TO TRANSPORT THEM TO PAPER MILLS THAT DIDN'T EXIST YET. NOT EVEN 10 PEOPLE CAN PICK UP AND MOVE A TREE BLOCK. GO TRY IT. IT DOESN'T WORK. YOU NEED SPECIAL TREES IN ORDER TO CREATE PAPER IN A PAPER MILL.. NOT ALL TREES CAN BE USED TO CREATE PAPER. NO ONE WAS EDUCATED IN ANY WAY, SHAPE OR FORM.. 99% OF PEOPLE COULD NOT EVEN READ OR WRITE UNTIL AFTER THE 1950s and the 1960s.

Many Native Americans were adopted by White families in the 1910s, 1920s and the 1930s and were given White names when the Whites used the Native American parents as slaves to build the towns along the rivers for them. Records today are completely fabricated by the U.S. Government and by the Whites because they don't want Native Americans to organize to get their land back. All genealogies on Ancestry.com and on any other source are completely fucking fake because in order to get an authentic record one must physically travel to the area and search for the records everywhere in the area to then upload the pictures of the records to these websites.. and no one ever did. The U.S. Government and also other White people who don't know what they are doing often create phony genealogy paper trails to get people who do not know what they are doing to connect their records to the phony genealogies and phony information and to people that they are not actually related to. Any records in a town are also completely or partially fake because they DIDN'T HAVE PAPERS OR PENS OR INKS IN ANY OF THESE FUCKING PLACES BEFORE THE 1960s. YOU NEED PAPERS AND INKS IN ORDER TO WRITE DOWN INFORMATION.. AND IN ORDER TO WRITE DOWN INFORMATION ONTO PAPER THE PERSON MUST ALSO KNOW HOW TO READ AND WRITE... EVEN THE WRITINGS ON MOST OF THESE RECORDS ARE FAKE AND WERE WRITTEN BY PEOPLE AFTER THE 2000s. TAKE A CLOSE LOOK AT THE PENMANSHIP ON ANY RECORDS THAT YOU LOOK AT...

IN ORDER TO MAKE PAPERS YOU NEED TREES. IN ORDER TO CUT DOWN THE TREES YOU NEED METAL AXES AND WORKERS AND FOOD TO FEED THEM HOUR BY HOUR AND DAY BY DAY SO THAT THEY CAN CUT THE TREES DOWN. IN ORDER TO MAKE METAL AXES AND METAL TOOLS YOU NEED IRON AND FOR IRON YOU NEED AN IRON MINE... THE IRON MINES ALONE CAN BE USED TO PROVE WRONG 99% OF THE HISTORY WRITTEN BY THE U.S. GOVERNMENT AND BY WHITE PEOPLE.. YOU CAN'T CREATE A METAL AXE OR METAL TOOLS TO CUT DOWN TREES UNLESS YOU HAVE IRON.. IN ORDER TO GET IRON YOU NEED WORKERS TO MINE THE IRON OUT OF AN IRON MINE AND TO TRANSPORT THE IRON TO AN AREA WHERE YOU CAN REFINES IT INTO STEEL OR OTHER IRON TOOLS. YOU CAN'T PICK UP A FUCKING FALLEN TREE AND MOVE IT TO A PAPER MILL EVEN IF YOU HAVE 100 PEOPLE BECAUSE IT IS TOO FUCKING HEAVY. YOU NEED VEHICLES AND GASOLINE AND MACHINERY IN ORDER TO PICK UP A FALLEN TREE AND TO THEN LOAD IT ONTO A VEHICLE THAT WILL THEN TRANSPORT IT TO A PAPER MILL TO MAKE THE PAPER. THEY DID NOT HAVE ANY FUCKING PAPER MILLS IN OKLAHOMA YET. WHY ? BECAUSE THE TECHNOLOGIES WERE NOT FUCKING INVENTED YET. THE FIRST CARS IN OKLAHOMA AND EVERYWHERE ELSE WERE IN THE 1930s AND AFTER AND THOSE VEHICLES ALSO COULD NOT TRANSPORT TREE BLOCKS. ONLY THE VEHICLES MADE AFTER THE 1950s WERE CAPABLE OF TRANSPORTING TREE BLOCKS TO A PAPER MILL, EVEN IF THE PAPER MILL WERE RIGHT THERE IN THE AREA NEXT TO ALL OF THE TREES TO BE CUT DOWN. EVERYONE IS FUCKING LYING. THEY DID NOT HAVE BIG TRUCKS OR EVEN ROADS FOR THEM TO DRIVE ON TO TRANSPORT FALLEN

TREES OR EVEN PIECES OF FALLEN TREES THAT WERE CUT INTO PIECES IN THE 1930s OR EVEN IN THE 1940s OR EVEN IN THE 1950s TO ANY PAPER MILLS ANYWHERE.. WHY ? BECAUSE THE PAPER MILLS DIDN'T FUCKING EXIST YET. IF THEY DIDN'T HAVE PAPERS THEN THEY ALSO DIDN'T HAVE ANY BOOKS OR PAPER RECORDS ANYWHERE.. AND THAT MEANS THAT ALL RECORDS WERE COMPLETELY FABRICATED AFTER THE 1950s.

All videos on Youtube about Native Americans are fake and are invented by the Whites. There are even white people in the videos wearing paint on their bodies who are pretending to be Native Americans. All of the history about Native Americans is fake and fabricated by the Whites. I will use the "Canoe" as an example.. Since it's true that

all Native Americans lived by livable river areas where it was warm enough in the winter time to survive because they could not have lived anywhere else, and since it's also true that Native Americans only had access to stone tools then that means they could not have ever made a "Canoe" because in order to make a "Canoe" one must be able to continuously drink water and eat food while they chop down a tree with a stone tool. This takes a lot of energy and one can usually only do it for up to 6 hours per day with 20 minute breaks in between.. even if you have 80 LBS of solid muscle in the upper body. One can only chop down a tree with a special stone tool and only where the hand can reach.. if one successfully chops down a tree with a stone tool (this takes several weeks to months as 1 person and requires eating at least 3 - 5 LBS of food per day and also requires drinking more than 1 gallon of water intake) the tree will fall in the direction of the weak point, and when the tree falls the tree will usually fall onto other trees in the area because the area is never clear enough for it to fall flat onto the ground. Most natural trees do not grow straight.. they are curved. If you happen to find an area where it is clear enough for a tree to fall flat onto the ground you must then also chop the fallen tree to cut a length off of the entire fallen tree to then begin to build the "Canoe". You will find that you cannot move the tree even if you have 100 people because it is too heavy and most trees are not wide enough to build a "Canoe".. and most trees by rivers are not big enough or wide enough to use to build a "Canoe". But some are. Any wood submerged into water for more than ~25 years turns to mush.. This proves that they never recovered any "Canoes" from any lakes or any rivers and that history is completely fake and fabricated by the U.S. Government, by fake Native American tribes and by the Whites. Even if you kept chopping a fallen tree into the shape of a "Canoe" it would take years to build one and even if you did build one you would not be able to pick it up to move it into a river because it is still too heavy and even if you could move it to a river, it wouldn't float on the water. It's fake.

In the lands that are now known as Oklahoma and Northern New Mexico many Native American children and babies were killed by Whites or taken away from their parents by Whites. When the Whites cut down and killed Native Americans along the rivers the Whites used swords to kill them and sometimes the children and the babies would also be killed or taken away and given to White families. The Native Americans could not easily fight back against the Whites because they did not have swords, they only had stone tools and rocks. Most Native American women were raped by White men and during these times there was no birth control and therefore if a woman was raped she was absolutely impregnated. Most Native American men and women were forced into slavery by Whites by forcing them onto ships that floated on the rivers that would take them to the towns along the rivers built by the Whites after the 1880s - 1890s in what is now known as Eastern Oklahoma. It was permitted in Christian warfare which were the ways of the Whites, to rape Native American women because they did not believe that Native Americans were part of God's plan. Most Whites were not educated anyway and they did not know the true Christian ways because there were no Christian churches that were built there yet to teach them... All information was passed down from generation to generation. In the 1870s and the 1880s in the lands that are now known as Oklahoma and based on the abundance of resources that are known now from river to river there, one can conclude that there were at least ~75,000 Native Americans living there in the entire territory before the Whites began building the first town in South Eastern Oklahoma along the river there.

Train tracks cannot be laid down unless there are workers and an abundance of iron rails and wood in the carts filled with food and drinks to feed the workers who slowly lay down the train tracks day by day and year by year further out until it reaches the end of the tracks, and the food supplies must be placed onto the carts from the previous town and sent up the rails to the workers who slowly lay down more train tracks to go further out and the food only lasts for so long before they have to go back to get more. In order for there to be train tracks there must be an iron mine nearby and a place to refine the iron into steel to create the metal train tracks.. because you cannot transport iron by hand or by horseback because it is too heavy. Iron processing requires fire and other techniques to process it and therefore the areas to process it must be near an iron mine and there must also be food to feed the workers or they cannot continue making it. This proves that the Whites did not begin laying down train tracks in these areas until long after the 1930s because of where the iron mines were and are located now today and because of how hard it is even today to move the iron to a location to refine it into steel.

The ways that they really found new areas to build towns was by following the rivers up and down on foot and by horseback. Why ? Because again if you WALK AWAY FROM A FUCKING RIVER YOU DIE BECAUSE THERE IS NOTHING ELSE OUT THERE... IT'S WILDERNESS WITH NOTHING.. NOT EVEN ANY ANIMALS ARE THERE. This reality proves wrong all of the histories written down by Whites today and by people claiming to be Native Americans in Oklahoma, but they are not Native Americans at all whatsoever in any way shape or form... the Trail of Tears is also fake because the rivers do not connect in the ways they show and therefore they could not have walked from Tennessee into Oklahoma / Indian Territory because they would have died from lack of water. The first towns in what is now known as Oklahoma supposedly began being built by whites after 1889... this is only 11 years away from the year 1900. Even the Oklahoma Land Rush Claims are completely fake because again, THEY DIDN'T HAVE ANY FUCKING PAPER OR INK TO WRITE DOWN THEIR NAMES TO MAKE A CLAIM ANYWHERE. THIS MEANS THE WHITES SLOWLY MOVED INTO THESE AREAS DAY BY DAY, MONTH BY MONTH AND YEAR BY YEAR AND THEY KILLED ALMOST EVERY NATIVE AMERICAN THERE AND THEY LATER WROTE DOWN THEIR OWN FABRICATED HISTORY ON THE PAPERS AFTER THE 1960s.. WHY ? BECAUSE THERE WAS NO FUCKING PAPER YET. THE CLAIM OF THE DAWES ROLLS IS THAT SOMEHOW WHITE PEOPLE WROTE DOWN THE NAMES OF 250,000 NATIVE AMERICANS THAT THEY RECOLATED THERE, THEY DIDN'T. IF THERE IS NO PAPER OR INK TO WRITE SOMETHING DOWN THEN YOU CAN'T WRITE IT DOWN.. EVEN IF YOU HAVE PARCHMENT YOU WOULD NEED SEVERAL THOUSANDS OF FEET OF ROLLABLE PARCHMENT AND 100 GALLONS OF INK TO WRITE ALL OF THE NAMES DOWN. AND YOU WOULDN'T BE ABLE TO DO THAT ANYWAY BECAUSE YOU CAN'T TRANSPORT 100 GALLONS OF INK INTO A FUCKING AREA TO USE IT TO WRITE IT ALL DOWN. THINK LONG AND HARD ABOUT THAT.

My paternal grandfather was at least 1/2 Native American of the areas that are now known as Oklahoma which was formerly known as Indian Territory in the early 1930s. 99% of the history of Oklahoma is completely fake because it was written by the Whites... and all of the Native American words there are either mixed words with pieces of real Native American language or the language and the words are completely fake. All Native Americans had to live by rivers from the point in time of when they arrived in the lands that are now known as America up until the 1840s... because if anyone walks too far away from a river they will die because there is no more water to drink and there is no more food to eat anywhere. It is all wilderness everywhere where there are no rivers, even today... even back then as far back as the 1840s.. all Whites also built the first towns near rivers and waters in what is now known as Tennessee and Oklahoma today.. because that is the only way that they could have survived. The rivers are where all of the animals go to drink water and to eat other animals... if not, then they die because there is nothing to eat or drink. Think about it.

Native Americans could only use stone tools from the point in time of when they arrived in the lands that are now known as America up until about the 1840s. The reason they could only use stone tools was because of the fact that it was the Whites that brought iron technologies into the lands that are now known as America... iron technologies would be steel knives, swords, rifles, etc. The first lands that were settled by the Whites in the areas that are now known as the United States of America were in what is now known as Tennessee. Why ? Because the southern tip is the warmest area... even in the winter time. All of the history now is fabricated by the U.S. Government and by the Whites.

This article will also show everyone who the fake Native Americans are. It will set the facts straight on when the Europeans actually arrived in the lands that are now known as America.. and it will prove wrong nearly all of the European written histories in America, about America and about Native Americans.

HOW TO PROVE THERE WAS NO BRONZE AGE ?

There was a Stone Age.. the Stone Age means that all humans used stone tools and pieces of stone to do work up until the year when humans discovered iron and then to the year of when they had an abundance of it to then create things out of it like swords. Why was there no Bronze Age ? Because Bronze is metal.. since bronze is metal that means that humans mined it out of the earth somewhere and they knew fire processing techniques to forge it into different shapes like shields and helmets and things that are made of this metal.. iron is also metal and steel and is made from iron.. iron is mined from the earth and from mountains. Bronze is the same thing as iron because it is metal and bronze is usually found near iron. Since they claim that they could create things from bronze using fire technologies by heating the metals into different shapes like bronze helmets and bronze shields then they should have been able to do the same thing during this time period with iron. How can they claim to have made different things from bronze if it is made of copper.. ? It isn't and it isn't possible anyway during the years they claim was the Bronze Age.. it's all different metals. In short there was no Bronze Age.. there was only the Stone Age and then there was the age of metal.. The stone age lasted up until the year 1800 A.D.. There was no bronze age. Again, anyone can use this to prove that Europeans did not actually get to the lands that are now known as America until after they invented metal ships.. there were no metal ships in existence until after they built the first one in 1830 A.D. in Europe.. it was not built in "America"... why didn't they build a metal ship in Europe before the year 1830 if they had bronze metals before the year 1830 in Europe and they supposedly

created bronze helmets and shields out of that metal before the year 1830 and during the Bronze Age which supposedly lasted 5,000 years up until the year 1830 A.D. ? If they did, then they had over 5,000 years to play with the metal bronze by using the metals to create different shapes by melting it down in fire.. In short, they're all lying about everything. There was no Bronze Age.. there was only the Stone Age all the way up to the point of when they discovered Iron... Because Iron is needed to make steel and steel is needed to make swords and train tracks, etc. Some land masses even connect.

It is more than likely that based on comparing the inconsistencies in the documentation that supports the claims of the histories from area to area and also by using reality as a fact, that means that the Europeans probably first discovered America in the summer of 1793 or long after when British / English and Danish explorers sailed in ships made of wood, manufactured in shipyards in the island of England and possibly in Denmark shipyards who then assembled a crew and set sail to Iceland and then to Greenland where they first saw the tip of America, what they later named "New Found Land" which is an English phrase which indicates that it was named by English speakers, not French or Spanish... this phrase later became abbreviated as: Newfoundland. This naming included land masses above what is now known as Newfoundland, but was later annexed into a smaller territory now known as Newfoundland above Nova Scotia, a smaller area. Nova Scotia could mean "New Scotland" or New Land in a language that is not English.

Why would it have been the summer of 1793 ? Because of the routes and waves of exploration and settlement on the island of Iceland... which is supposedly about 500 miles from the island of England... since all of the information and the records about it is inconsistent that means that one can extract the truth from that by comparing that information to reality of maritime and sailing in a wooden ship with sails with enough food and river water to last the crew for the journey there and the journey back during this time in the late 1700s and the early 1800s. If it is true that the Danish reached Greenland in the 1750s and also sailed back to Iceland for more supplies and a return to the island of England then it is also true that they had another approximately ~43 years from the 1750s to 1793 until they found "Newfoundland".

The only thing that each European country and each area within each European country can do at this point is alter their already fabricated historical records to support future fictitious claims, but at this exact point in time most of this truth can be proven with reality.

During these decades and according to the history the English were at war with the Irish and no Irish people were permitted to serve in any English Naval Forces with rank or at all. The Danish, Norwegians and the Frisians of the Frisian Islands during this time were at constant war with the Slavics and all Russians.. all Slavics and all Russians that crossed into Germany, Norway or Denmark would be captured and killed by the Norwegian and the Danish from 1600 onward. Slavics were not permitted to serve in the Danish Naval Forces. This means that the Danish and the English probably first discovered America in the summer of 1793 based on the documentation for when the ships were made in the shipyards in England, but only if that information is true.

Decades later in the early 1820s and the 1830s when the steam ship technologies were invented (The first steamship was supposedly built in England in approximately 1830) to travel long distance by ship, the Spanish later took Central and South America and the English and the French took the east coast areas of North America. The warmer areas that support easy life up to 8 - 9 months out of the year are now all of the eastern U.S. States that are halfway below the Carolinas and much of the parts of what is now known as Tennessee. America is more than likely a Latin word that means "New Land" or "New World".

Greenland was supposedly called Gronland by the Danish which supposedly means Greenland in Danish or "Green Island". In the summer time many parts of Greenland is green, but food cannot be grown there and there is not much animal life, if at all.

If the previous is not true then it is more than likely that America was discovered after the invention of the metal steam ship in England after the 1830s since it would probably be impossible to travel from England to Iceland then to Greenland then to a coastal area of America that is warm enough to immediately provide food and water from a river to the passengers / explorers of the wooden ship.. and it is also impossible for a wooden ship to travel any route from England to the coasts of America across the Atlantic Ocean because of several different realities.. then that also means that America would have actually been discovered after the invention of the metal steam ship in England and the means to contain food and river water where it would last long enough to feed the passengers / crew to reach the coasts of America, but if that is true then how did they know about the landmass at all at that point in time ? They couldn't have. We also now know and can prove that ancestral genealogies are fake or partially fake due to several different realities.. like the ability of recording of information and records did not really exist in America from area to area until after pens and ink were in circulation in

communities with access to papers or the means to write the information down on something.. and it actually being preserved in some place that could not be altered at a later time.. usually most people only know the names of their great grandparents or great great grandparents and their origins.. if that is even true information at all. Information and stories being passed down need to be verified with reality and there are so many fabricated histories everywhere.

In order to prove that the first steam ship was built in England after approximately 1830 and to prove there was no steamship and no metal ship in existence before that one must carefully examine the documentation of the Naval history of the United Kingdom and compare all of the dates and information as well as compare that information to the iron mines in France and India and Morocco. One will find that they brought the iron from these places into the island of England after approximately 1830 so the iron could be experimented with to invent the first metal ship because before 1830 they did not have enough iron to do it. If they did have enough iron before the 1830s then they would have built one before that, and they didn't.

All Native Americans, especially just up to 10 years before the arrival of Europeans, had to live by rivers that they could drink water out of every day because they didn't dig wells anywhere at all or build settlements anywhere except for by rivers where they could get fresh water every day to drink.. It is impossible to drink water from a frozen lake or from a frozen river or from the ocean.. the ocean has salt water in it and it cannot be drank. If one drinks ocean water for more than 2 days then that person dies. Where it freezes (+30 degrees farenheit) it usually also snows at some point and this means that fire cannot be started in any area where it snows or where it rains because the snow and the rain makes everything (leaves, twigs, wood) in the area wet... if it is moist or wet then no fires can be started. Even if a tribe managed to save hundreds to thousands of twigs and dry leaves and burnable things in the area during the summer time and save it into an enclosure one still could not start a fire with it in the winter because it gets wet and moist anyway. If one were to build a house under the earth halfway in the summer time the materials saved in it still get moist in the winter time and cannot be used to start a fire.

This means that Native Americans did not live where it snowed or froze over such as in all of what is now known as Canada, New York, etc. Why ? Because it's impossible. In these places in the winter time up to 5+ feet of snow falls and the temperatures drop to negative -30 degrees farenheit in most of those areas... during this time of year all of the lakes freeze over and all of the rivers freeze over... since those things freeze over then no one could get water out of it or

drink it cold in the negative -30 degrees fahrenheit weather because it would freeze the body because there is absolutely no warmth and the body would slowly die. There are no animals to capture or eat during these months.. because they migrate to warmer areas toward the end of summer, usually at a speed of 30+ miles per hour. Some animals do hibernate, but not all. There is no food to gather during the winter in these places and therefore it is impossible to live there without White technologies and domesticated animals and farming... which is something the Native Americans did not have and even if one does have White technologies it is still very difficult to live there in the winter months, even today. Food can only be grown with sunlight and with water and only if it is warm enough in the area to do so.. this is usually only 2 - 3 months out of every year in most of these places where it drops to negative -30 degrees fahrenheit in the winter time... in freezing temperatures all crops die and so do any animals including cows because there is nothing for the animals to eat and there would not be enough food from a food grow to feed the people / person to survive the winter. The cows can eat the grasses, but they would still die from freezing temperatures and from sickness and one would not be able to cook the meat of the animals because they would not be able to start a fire to do it. One can only walk at the most 18 - 21 miles per day at a speed of 3 - 4 miles per hour. That means that in about 40+ days one can walk about 250 - 320 miles at the most because by every 7th day one must also rest for 24 hours.

Only so much captured food can be carried on one person and only so much water can be carried in a pouch made from animal hide before needing more. This means that tribes that migrated by foot did it slowly and had to also capture food along the way in their migrations, but they could only go so far in 24 hours (up to 21 miles per day by foot) and they could only travel by river. Why ? Because if a human person travels too far away from a river they will die from lack of water to drink and a lack of food to eat. This means that any Native Americans in these areas today where the temperatures drop to below +35 degrees fahrenheit and negative - 30 degrees fahrenheit such as in Canada, New York, etc.. were brought there between the 1930s and the 1960s from other places in America, probably as work slaves and then freed on the next generation. Even the languages that they claim are their languages don't match (syllables and characters).. or they are entirely fake and fabricated by the Whites that settled there now.

One human must consume at the very least 8 ounces of food per day without moving and if moving one must consume at the very least 1 LBS of food or greater per day. If not then that person gradually loses weight and strength when expending daily energy and will drop weight to between ~90 LBS and ~130 LBS. If one loses too much weight and energy they can no longer

easily capture animals because they will not be physically capable to do so and if they can't do that then they die from starvation.

If a human only eats fruits for more than 3 - 6 months the body weight drops to between ~90 LBS and ~130 LBS especially if expending energy each day, and the same will happen if only eating vegetables or only eating vegetables and fruits. All humans need meat with fat, fruits and vegetables and water in order to supply the body with all of the vitamins needed to continue on to the next day and to build up weight and strength. They might show you videos of " Native Americans " living in freezing temperatures in the snow and ice, but I assure you it is fake. It is not possible to live in those areas before White technologies... this means that before European arrival absolutely no one lived there.. not even Native Americans... there is nothing in those areas that can be used to make a knife such as from stone or even a spear from wood. There is no wildlife in these areas when they are frozen over and because of that anyone in that would die within less than 1 week of gradual freezing. Native Americans did not live in Ohio or Michigan or New York or Canada. It was untouched land. Much of the histories of Native Americans is fabricated by the U.S. Government and by Whites and by fake Native American tribes, but it began being fabricated after the 1940s with the invention of the U.S. Federal Government in the 1950s. Previously the U.S. Federal Government did not exist.

Many areas within the U.S. are erroneously named Native American words that are not real Native American words or are Native American words that were encountered by the Whites that was spoken to them by the Native Americans in what became known as Tennessee after the 1850s, but these names of areas and towns are not the correct words attributed to the real language of the real Native Americans. The Whites still do not know the true history and the true languages of the real Native Americans because after they killed most of them by the rivers where they lived they then used what they knew about them to name areas within the U.S. after the 1930s. There was a scientific movement of the 1970s within the U.S. where White scientists began efforts to preserve the history of Native Americans. Entire Native American languages today are fake and fabricated by the Whites and the languages have Arab words in them and words in them from India, invented by White linguists in Oklahoma to hide the genocide of the Native Americans that were killed there by the rivers. Native Americans are depicted with Arab culture and with culture from India by the Whites, but they didn't have any of that culture because the Native Americans never had contact with the Arab or with people from India. Native Americans did not have beads before European arrival. Native Americans did not wear Arab or Indian (From India) head garbs or clothing. It is an invention of the Whites to

create this for fake Native American tribes. The British would call any native people that they encountered outside of India (Indians) because it was a racial slur similar to nigger.

How To Prove That The Europeans Did Not Actually Begin Arriving In America Until After The 1830s ? Because of What A Wooden Ship Is Made of and Food Supplies Don't Last

A wooden ship is made of wood. Wooden ships were made in shipyards in the island of England usually with trees from Ireland, Scotland, England and nearby places and treated with different things before the invention of the iron ship and the metal steam ship in approximately the year 1830. Wooden ships with sails could only go so far even with a large crew because wooden ships with sails can only travel as fast as the wind carries the sails combined with the weight of the ship, which is usually only up to 15 miles per hour on average. Ships will never sail in 1 direction at any speed because the wind does not only blow in 1 direction at any given speed for any fixed amount of time. The distance between England and Iceland supposedly is anywhere between 500 miles and 1,100 miles.

Any supplies that are brought onto a wooden ship such as food and drinkable water (from a river in England / Ireland) will expire and cannot be consumed after a certain amount of time. All water from any river in the island of England / Scotland and Ireland and anywhere else would form bacteria on the water after about 14 - 20 days and would no longer be drinkable. Rain water can be collected and drank on a ship in the ocean, but the rain water still has some salt in it and would need to be contained in something and it still wouldn't be enough to survive.

If the river water from the island of England / Scotland and Ireland or even Iceland is placed into a container it would still form bacteria in the water on the surface after about 14 - 20 days and if it were consumed after that point it would make the person sick and slowly kill them from losing strength. Only so much drinkable river water could be brought onto a wooden ship or even a metal one and it wouldn't last long enough to drink every day. Operating a wooden ship requires physical work and for physical work one needs continuous food and water intake or one cannot continue working. One cannot drink water out of the ocean because it is salt water and one cannot only eat fish from the ocean because if you do then you die after about ~20 days due to lack of vitamins would make the body so weak that it dies. One cannot start a fire on a wooden ship to cook any food or fish because it's impossible to start one due to the humidity, rain and because everything burnable would get wet anyway... even inside of a cabin. If burnable materials are wet or humid or moist in the cold of the ocean.. then it cannot be burned to start a fire. One cannot eat only raw fish for more than ~23 days or the person will die

from lack of vitamins, the entire body becomes so weak that it collapses and dies. At this rate it takes about 3 - 6 months to sail 5,600 miles in a wooden ship with sails so that means it is impossible that they went further than Greenland or Newfoundland in the summer of 1793 because there wouldn't have been anything there for them to collect to build to stay and eat and survive the winter. This also means that it is impossible that they crossed the Atlantic Ocean from any European ports to sail to east coasts of America because there are not enough food supplies to last the crew for the journey and they would all die from starvation and lack of drinkable water.. no islands in the Atlantic have any food or animals for meat.

Supposedly the first metal steam ship / metal steam boat was built in the island of England in approximately the year ~1830 with iron delivered to England that was mined from the countries of India and France and Morocco. Only a steam ship / steam boat could have made the journey to carry passengers / a crew with enough food supplies that would actually last long enough to not expire and to feed the people on the ship where they could live long enough to travel from point to point from the island of England to the island of Greenland to the to the East Coast of what became known as America. The ship was not built in America because there were no people here in America to mine any mines to mine out the iron needed to build it and the mines did not exist yet anyway.. so this further proves that the Europeans were not here in America yet before the ~1830s. The first mines with iron that were discovered by the Whites in America were discovered and began being mined from the mines in around the year ~1850 maybe near the Eastern U.S. States. We know this could be true because it is probably true that mines in Missouri began being mined in around the 1880s to the early 1900s. Supposedly metal steam ships / metal steam boats can travel up to 8 - 14 miles per hour and if this is true then at this rate one can sail from the island of England to the island of Iceland (if it is true that the ocean distance between these 2 islands is ~500 miles) at 8 miles per hour * 24 hour days = 192 miles per 24 hours.. and this means that a metal steam ship could reach the shores of Iceland from England in 3 days... and from there it could reach Eastern Greenland shores (supposedly an ocean water distance of ~900 miles) maybe 5 more days after that, but the steam ship would need continuous materials to burn and could not get moist or wet in the humidity of the ocean weather and there would need to be the means to burn it and there would have to be enough of it to burn. So that means this scenario is probably fake because they still did not have the technologies to reach the east coasts of America with a steam ship / steam boat at all in the early 1800s.

Horses Cannot Eat Other Animals ?

No.. a horse is a very unique kind of animal and it cannot survive on its own.. take a good long look at what a horse is made out of. Horses are 100% multigenerational domesticated animals by Whites from Europe. There is absolutely no such things as a "Wild Horse" because a horse cannot eat other animals. A horse can only eat things that it can reach from its neck which would be fruits dropping from trees above it and grasses on the ground and any other vegetables that grow out of the ground. A horse cannot attack or eat another animal. It can only drink from a natural water source such as from a river.

What is a Native American ?

Native Americans are any person who biologically descends from people who lived within the continent of what is now widely known as America before the arrival of any other peoples such as the Europeans... foster-ship of a non-Native American into a Native American Tribe does not make that person a Native American unless they marry in and have offspring... Only biologically descended people from biological Native Americans are actual Native Americans.

Who Has Rights To The Lands of America ?

Only a person who is actually biologically descended from a real Native American has a right to the lands now known as America, but only in the places where their ancestors actually lived and spoke an authentic Native American language.

How am I part Native American by blood ?

My biological grandfather was part Native American by blood, born in Oklahoma Indian Territory in the 1930s and who traveled to Kern County, California during the Oklahoma Dust Bowl.. My great grandmother Georgia Hiawatha Jennings was also a small amount of Native American by blood from Oklahoma Indian Territory.. I have more from my other biological grandfather who was part Native American by blood and who was born in New Mexico in the 1930s, but since many know these names now and not the other ones I will not mention them here.

Oklahoma was not actually a ratified State of the Union until after the 1930s.. Oklahoma did not record the birth information of anyone that was born there until after the 1950s and the 1960s and the 1970s because there were no hospitals in Oklahoma until after the 1950s and most Whites were born on family farms that recorded the birth information of the children into the

family bible. Family bibles cost a lot of money back then between 1890 and the 1940s it was a luxury and not everyone had one. There were no schools, there were no train tracks, there were no trains, there were no cars. The first gasoline vehicle was invented in the 1930s. Most farmers and farmer families ate all of the food that they grew on their farms.

Who can a real Native American prove that they are a Native American ?

Documentation cannot prove that a Native American is a Native American.. only the natural adult teeth and natural hair and natural facial features can prove that a Native American is a Native American or that a person is part Native American by blood.

What Did Native Americans Have and Not Have Before European Contact and Inventions ?

Native Americans did not have guns or metal knives, they did not have bows and arrows, they did not have horses, they did not have pigs, sheep, goats, cows

or any kind of European animals.. they did not hold animals captive for farming, they did not dig into the earth for water, and only certain places within an area

can be dug into to get water. They did not have beads or vests made of beads because beads are a European invention. Native Americans built stone knives and the power of fire was a heavily guarded secret. Flint rocks do not occur naturally in any rivers or in any locations.. flint rocks are mined from the earth and were discovered by Europeans. Native Americans did not have flint rocks.

Where Did Native Americans Actually Live and Not Live Before European Arrival ?

It is impossible to live in freezing temperatures without White technologies and techniques. Native Americans could not go far from drinkable water (fresh water rivers) and food sources because they were on foot without horses because horses were brought over to the Americas by ship after the 1830s. Since a human being can only walk non-stop up to 18 - 21 miles per day before the need to rest.. and this usually costs up to 6 hours of one day this means that all Native Americans lived by rivers with drinkable water and streams that supported life because all animals would also live in the same places so they could eat other animals and drink water. Native Americans did not live on the beaches or the coasts before European arrival because there are no drinkable water sources on the beaches or the coasts and they also did not live in the deserts unless there was a river they could drink from every day and they did not live in freezing temperature climate areas because it is not possible to survive in it. This means

Eskimos are fake and it also means Hawaiians are fake because there is no drinkable river water on Hawaii.. it is all salt water. There is no such thing as a native Hawaiian.. the Hawaiian people were brought there to the Hawaii islands probably between the 1860s and the 1920s by white slavers who picked them up in asia with black slaves and put them to work. Hawaii were empty islands and could not feed or support any native human population because there is no drinkable water on the islands.. it is all salt water rivers. There was no animal life. Everything was brought to Hawaii at a later time by ship.

How To Prove The Trail of Tears Is Fake ?

Because the distance between Eastern Tennessee and Eastern Oklahoma today is roughly 600 miles by driving on man made roads. If it were true that Native Americans were forced to walk or ride a horse to Indian Territory from Tennessee this would mean that they would still need to travel by rivers and waters so that they could eat and drink on the way there or they would die from starvation and dehydration. It takes up to 40+ days to walk the man made roads from Eastern Tennessee to Eastern Oklahoma today at the speed of 3 - 4 miles per hour and one human can only walk up to 18 - 21 miles per day before the need to eat and rest. This takes approximately 6 hours to walk 18 - 21 miles. One must also rest for a full 24 hours every 1 and 1/2 week to recover from the walking. If there is no food or water one cannot continue the journey. The rivers do not connect in Tennessee to Oklahoma because they are broken up and one cannot walk along them to get there and during this time much of the land was forested. Horses need to eat and drink and rest. The roads back then didn't connect. There were no routes to walk or ride a horse. It took up to 6 months or longer to navigate the lands on foot or by horse to travel from what is now known as Eastern Tennessee to what was known as Indian Territory (Now Tahlequah) by going from water area to water area and while also hunting for food to eat every day. The Whites would have never entered into the lands known as Indian Territory by the Whites during these times because they would have been killed by Native Americans. Any lands west of the borders of Tennessee were known as Indian Territory by the Whites and the borders of Tennessee gained more territory west as the Whites slowly settled it... until they reached the border of Tennessee and the area now known as Tahlequah in around 1890 where the Whites built the first military fort by a river. Arkansas did not exist during this time.. Arkansas was named decades later and was not a U.S. State until after the 1930s. The Whites slowly built the roads and houses and cut the trees as they moved in and settled more and more west within the areas now known as Tennessee until they reached the border of what is now known as Tahlequah. It was a slow invasion from between 1850 and 1890 where the Whites moved in decade after decade into livable areas by drinkable waters and areas where they could grow food and run a small farm in Tennessee and if they encountered any Native

Americans they would simply kill them all or use them as slaves for work if they could make them.

How To Prove That Each Individual European Country Began Fabricating Fake History For Themselves and For Their Presence Within America ?

Each individual European country began fabricating fake histories for themselves and for their presence within different areas in America after their arrival in approximately after the year 1830 by writing books and texts with fabricated history about America in each European country. The books and the texts themselves once examined from each country such as from Spain, France, England, etc. show that each text is completely inconsistent with each other with

different dates and fabricated people, especially in texts from England. England and France would usually create completely fictitious people with fake titles of nobility and make the claim that there were battles between them and Native Americans. They would glorify the genocide of Native Americans and make it look like there were these grand battles and wars, but there weren't. All Native Americans lived by rivers where they could drink water and gather food and capture animals. Once Europeans encountered and found these places decade after decade they encountered the real Native Americans and they would simply kill them all. If a beautiful Native American woman was captured she was usually kept as a slave and shared among the white men until she had no more usefulness. Sometimes the Whites would capture beautiful Native American women and would get them pregnant, but not all of the children were kept due to the extreme racism of the Anglicans and the Catholics. The Anglicans were the English. The Catholics were usually the French and the Spanish and the Danish. It was usually permitted by other white men for a white man to be with a Native American woman sexually if their white wives did not know about it, but if a white woman was with a Native American man the Whites would usually kill them both and the child, if there was one. Native Americans were picked up by white slavers in different areas of these places within what is now known as Tennessee and sometimes put to work to build if they could make them do it. The Whites also later used black slaves when they brought them over to fight and kill resisting Native Americans after they had horses and could travel away from white encroachments.

Europeans invented completely fictitious histories for themselves within the U.S. after they began settling it more and more west. Fictitious genealogies, fictitious town histories, fictitious encounters with Native Americans, fabricated dates on when they discovered mines to mine minerals. In other words: America was invaded by Europeans decade after decade while they found and settled on livable lands and while they did that they also fabricated their own

histories and killed nearly every Native American along the way. The entire U.S. history is fake and in order to prove it one must only research the mines across America. The mines are where the minerals are mined such as gold, silver, copper, iron, coal, etc. It is impossible that anyone could have lived near a mine or have discovered a mine before the 1880s because in order to mine minerals out of a mine there must be a population of people that live near the mine and who also have continuous supply of food and resources so that they have the energy and the strength and the tools to continue mining day by day, month by month and year by year. Most lands near mineral mines cannot be used to grow food and there is no drinkable water near them unless wells are dug to get water. There must also be a means to transport the minerals from the mines to ships that take the minerals back to Europe or take the minerals to places where the minerals can be worked to create things from the minerals. If the roads did not exist and if there were no train tracks and no trains to transport the minerals then we can safely conclude that no mines were discovered in Nevada until after the 1950s and no mines in Missouri were discovered until after the 1880s. Why ? Because the Whites weren't there yet.

Native Americans Did Not Have Any Kind of Rights or Legal Rights ?

No. Native Americans were not considered part of God's plan in the Anglican Church and the Catholic Church. They were considered enemies of Christendom and it was viewed

by the Whites that this new found land they named America was part of God's plan for the Whites to settle and expand. Native Americans were not given any kind of legal rights anywhere, not even in Oklahoma. Not even up until the 1970s during the American Indian Movement. Previously Native Americans were not even permitted to go to court before the creation of Civil Rights and nearly all Native Americans were genocidally killed little by little by the Whites expanding west. Some Native Americans did mix in with Whites, but very few. This means that any court records before the 1970s about Native Americans is fake and created by the U.S. Government.

The Dawes Indian Rolls Are Fake ?

Absolutely. The Dawes Indian Rolls are completely fake. It is impossible that anyone on the rolls at that point in time would be less than 1/2 Native American due to the fact of when the Whites began arriving on the borders of Indian Territory in 1890. It is completely impossible that Whites could write down the names of thousands of Native Americans in Indian Territory and what their "Tribe" was and how much Native American percentage in fractions that they were... Especially since it's a fact that the Whites did not have paper and ink until after the 1950s and the 1960s ANYWHERE and especially when all Native Americans lived by rivers that they could

drink from and with natural food and animals nearby and only in places where it was warm enough in the winter time to do so. It's the only way anyone can survive.. including Whites if they didn't have the animals and crop seed brought with them when they built the houses where they settled at.. not all areas have water in the earth. The fact that they used fractions in this system proves that it was devised by the Oklahoma State Government around or after the late 1930s to early 1940s and not before. Why ? Because of the years of the creation of the system of fractions invented in Europe was in the 1900s and the system spread by text books printed on the east coast in the 1940s... and there were no schools in Oklahoma. All schooling was taught by the family at home on their farms. Most white people in Oklahoma knew nothing of mathematics because there were no schools to teach them. Also the fact that the Whites did not find and map all of Oklahoma Indian Territory until they settled it all by the 1960s proves that they didn't find them all yet. It takes decades to build towns from the ground up from the materials in the area, it takes decades to lay down train tracks, etc. You need iron and wood for train tracks and for that you need mines and you need the means to process the iron into steel and workers and food to slowly lay the tracks. It's impossible that they reached them all to write the information down that they claim between the years of 1880 and 1914. Most Oklahoma Native American Tribes / Nations are filled with Whites who do not actually have any Native American ancestry... some do, but they don't even come from the Nations they say they do. Why ? Because the Whites wiped out all of their history, language, etc. Native Americans did not have a writing system. They did not have paper to write down information or a written language. They did not write down the names of their parents and siblings. They did not record their ancestral information or genealogy or where they migrated from. The Cherokee language is a mixed language with Arab words in it and with words in it from the country of India.. invented by Czechoslovakian linguists in the 1970s. Most of those real Native American languages are dead and lost to mankind. The Native Americans did not live in the Carolinas because it's too cold in the winter time. They did not live in New York, Canada, etc. It's impossible. They only lived in some places in Tennessee, Florida, Mississippi and only where it was warm and dry enough most of the time to live.

There Are No Real Native American Nations / Tribes Outside of California, Nevada, New Mexico ?

There aren't. There is no Eastern Band of Cherokee Indians and there never was. And why ? Because it's impossible to live in that area as a Native American before European arrival. There never were any Native Americans there. Native Americans could have only lived by drinkable river water or water streams where there were animals to capture and food to gather to eat every day. If not, then that person / tribe dies from thirst and starvation. Don't forget that

Native Americans did not have horses or any means of travel except for by foot before the Europeans brought the horses to America by ship after the 1830s... and it still took several years to decades for the horses to reproduce and spread out from area to area, year after year and decade after decade from the point of entry into America from the coasts on ships. One can only go so far from a river before dying and one can only walk up to 18 - 21 miles per day and one can only carry so much water and food with them in a pouch made from animal hide before they die from lack of water and food. Walking too far away from a river leads to death because of lack of water to drink. Rivers aren't everywhere. Most Native Americans that survived the White genocide in Oklahoma migrated from Oklahoma Indian Territory to the South West after the 1920s and the 1930s. Most Native Americans in Oklahoma Indian Territory that did not marry into White families migrated south to areas that are now called New Mexico walking along the rivers or died in Oklahoma Indian Territory. New Mexico was still called Mexico until about 1907 to the 1930s. Between 1900 and 1950s Oklahoma was not completely mapped by the Whites because they hadn't discovered all of it yet or built towns in all of the area that is was by that decade, but later the borders of Oklahoma were above what is now called New Mexico.. it was later annexed and borders were removed. The first dirt roads for travel by vehicle began being cleared from area to area in Oklahoma after the invention of the gasoline engine in the 1930s and the manufacturing of the first vehicles, but only after the vehicles were manufactured and brought to Oklahoma and given to White families. Not all families could afford a vehicle and there were no gas stations yet. The gas stations were built after the 1940s and only in certain areas and most vehicles could only travel by cleared dirt roads that connected to each other and the vehicles could only travel at a speed of up to 30 miles per hour.. the wheels often needed to be replaced and the distance they could travel was only about 70 miles. There were no connecting roads from Oklahoma to California or from Oklahoma to New Mexico. The only people that lived in what is now called New Mexico up until about the 1920s were Native Americans.. The Mexicans who spoke Spanish went to war with the Native Americans of what is now known as New Mexico and those Native Americans were also at war with the U.S. Army until about the 1940s. Most Native American Tribes in what is now known as New Mexico previously before the 1970s did not have "Reservation Land"... it was through the American Indian Movement of the 1970s when Native Americans organized to secure deals with the U.S. Government to get Native American Tribal Land Allotments. Many of the Native Americans in New Mexico today are not from the areas that are claimed... much of the history is invented by them and much of it is also invented by Whites, but New Mexico is actually the only U.S. State that has Native American Tribal Land Allotments and actually recognizes the Native American. There are no real "Indian Reservations / Native American Reservation Lands" outside of New Mexico State today.

The Cherokee and Choctaw Nations Are Fake ?

Absolutely. Cherokee and Choctaw were not the real Native American words that referred to those real Native Americans that fought the Whites in Tennessee and Oklahoma and died. There was a fusion of languages of the people which means that they mixed and this means they were the same kind of people after that point in time (I won't say when). The fact that there are 2 different tribal governments... one "Cherokee" and one "Choctaw" proves it was invented by the Oklahoma State Government ? Why ? Because they're same Native Americans after 1700 and this means the Oklahoma State Government doesn't know the true history because the Whites killed them all. Those people mixed blood at different times in different areas. The languages are even fake and have Arab words in them and words in them from India. It was invented by the Oklahoma State Government. The Whites killed every "Cherokee / Choctaw" in Tennessee between the 1850s and the 1920s. The people who are members of these "Nations" today might be part Native American, but they do not descend from those specific Native Americans because the Whites killed them all. They also add and remove names from the rolls even today and the fact that they do that also proves that it is fake. The "Indian Removal Act" also permitted all Whites to genocide all Native Americans anyway, and they did.

The Cherokee and Choctaw Nations Are Fake, Now The Names of These Already Fake Tribes Are Being Used By Whites To Make Money ?

Absolutely. The Cherokee and Choctaw "Nations" are completely fake and filled with Whites who have absolutely no Native American ancestry at all. The names and the phrases are used by the Whites to make money. The Whites killed every Native American that was called "Cherokee" and "Choctaw" by the Whites between the 1850s to the 1960s. The system that was created by the Oklahoma State Government about this proves that it is 100% fake because think about it: If there are 2 completely different "Native American Nations" where one is called "Cherokee" and the other is called "Choctaw" and each have its own different "Tribal Government" and each one issues a "Native American Card" that only says "Cherokee Nation" or "Choctaw Nation" that alone proves that it is fake because how can it be 2 completely different people when all of the Native Americans that were called "Cherokee" and "Choctaw" by the Whites actually mixed blood as far back as 1700... if they did, then that means that they are the same people. Now today the "Cherokee Newspaper" issues more phony histories now claiming recently that the "Spanish Indians" were part of the "Cherokee Nation" in the 1800s. This is impossible because there were no Spanish speakers in Missouri or Mississippi or Oklahoma and no Native Americans of these areas were ever called anything by any Spanish speakers. How do I know this information ? Because my great grandmother was part Native American from Oklahoma and my grandfather was probably about 1/2 Native American from Oklahoma who traveled to

Kern County, California in the Dust Bowl of Oklahoma. There were never any people called "Cherokee" or "Choctaw" anyway.. it was invented by the Whites. The Whites actually called every Native American that they saw at the creeks and the rivers "Creek Indians"... why ? Because British Whites spoke English and because the British Whites called any indigenous human being that they encountered outside of the country of India "Indians"... and they saw these Native Americans by the creeks because creeks are by rivers and the British Whites were on ships that sailed up and down the rivers so they could find new areas to build towns.. therefore they called them "Creek Indians". The British did not discover the country of India until 1840s and they were only there up until about the 1960s and the 1970s... They called the Native Americans that they encountered in what is now known as the United States "Indians" because it was a derogatory word that they used to call any indigenous person that they encountered anywhere outside of the country of India "Indians". No one could have called Native Americans "Indians" until after the British discovered the country of India in the 1840s... this proves the British were not in the "Americas" until after the 1840s because of how long it would have taken for the word "Indian" to be transmitted back to mainland England after the 1840s.

FAKE NATIVE AMERICAN CULTURE AND FAKE NATIVE AMERICAN ITEMS

Native Americans did not have beads unless it were made of wood. Native Americans did not wear things on their heads and they did not have foot wrappings or moccasins either. They did not have knives made of metal or guns or rifles. They did not have "Tomahawks", Canoes or even arrowheads either. All tools would have been made of stone. The only paints they would have had would have been by crushing up berries and other things in the areas by the rivers. Native Americans only had stone knives, wooden spears, clothes made from animal hide and only from the animals that went to the river to drink from the water.. they would have had feathers, but only from the birds that went to the rivers to drink the water and to pick up other animals near the river to eat.

When Did The Europeans Actually Discover America ?

How To Prove Wrong 99% of White History Within America

HOW TO PROVE THERE WERE NO CARS / VEHICLES OR ROADS ALMOST ANYWHERE UNTIL AFTER THE 1930s AND THE 1940s WITHIN THE UNITED STATES, CANADA, MEXICO AND SOUTH AMERICA

HOW TO PROVE THERE WERE NO PAPER OR INK OR PENS ALMOST ANYWHERE UNTIL AFTER THE 1950s AND THE 1960s WITHIN THE UNITED STATES, CANADA, MEXICO AND SOUTH AMERICA

BECAUSE THERE WAS NO PAPER OR INK OR PENS BEFORE THE 1950s AND THE 1960s THIS MEANS THAT THERE WERE NO RECORDS OF ANY KIND BEFORE THESE DECADES ?

Absolutely. This means that any Church records claiming to have records before the 1950s and the 1960s are completely fake. Why ? Because they did not have papers

before these decades and also before these decades this means that they could not write anything down or store it anywhere before these decades and therefore any records claiming to have been written before these times is completely fake. It is also impossible to transport paper and inks by horseback to any towns anywhere in Oklahoma or any other area because of the limitations of what kinds of things could be transported and because everyone including whites also had to travel by river on a horse to continue to get water to drink to keep traveling... even to the next town. There were ferries that once sailed up and down the rivers to towns that were built by the Whites, but again the technologies to make paper in a papermill did not exist until after the 1950s.

DID NATIVE AMERICANS GET MARRIED ? NO

Native Americans were not Christians.. because they did not know what Christianity was before the 1920s.. since they were not Christians that means they did not get married or have any kind of concept of Christian marriage.

HOW TO PROVE THAT THE WHITES NAMED AREAS IN WHAT IS NOW KNOWN AS NEW MEXICO ENGLISH NAMES AFTER THE 1940s, 1950s AND THE 1960s ? BECAUSE THEY WERE NOT IN THOSE AREAS YET AND BECAUSE THEY WERE NOT THERE YET THEN IT WAS NAMED AFTER THOSE DECADES BECAUSE THEY SPEAK ENGLISH AND NOT SPANISH

1 WHOLE NATIVE AMERICANS WHO ALSO HAD WHITE SKIN ?

THE WOMEN. NATIVE AMERICAN WOMEN WHO TENDED TO THE CHILDREN IN THE DWELLINGS HAD WHITE SKIN AND BLACK HAIR BECAUSE THE SUN DID NOT HIT THEM THAT MUCH

HOW TO FIGURE OUT WHICH NATIVE AMERICANS MIGRATED TO DIFFERENT AREAS AND WHEN, HOW LONG IT TOOK THEM YEAR BY YEAR

HOW TO PROVE THAT NATIVE AMERICANS DID NOT MIGRATE TO AMERICA FROM SIBERIA LAND BRIDGE TO PRESENT-DAY ALASKA ?

Since the land bridge is only created in the winter time when it drops below zero to freeze the waters to walk on because that is what is needed to cross it on foot or on horse that means that Native Americans did not cross into America from Siberia because if anyone ever tried that they would die within 24 hours in the winter time after crossing it. Why ? Because before the Whites showed up in the area there was nothing there... and the only way to cross it is in the winter time... therefore anyone that tried would die because there would be no shelter from the freezing air, there would be no water to drink because the waters are frozen over and there is no way to start a fire in the snow because everything in the area is wet from the snow.. there would be no food at all to eat. Therefore it is 100% impossible that Native Americans come from Siberia / present-day Russia. Even if they managed to get there in the summer time they would not have been able to get far and they would have died. There are no rivers there in that area and it would impossible to walk / cross over the mountains even if anyone had a horse. Everyone would die within 2 months after the end of summer. A person can only walk 21 miles per day.

THE REAL FACTS OF TRAVELING BY FOOT AND OR BY HORSE BEFORE ANY TOWNS WERE BUILT

The most any human being can walk per day is about 21 miles per day on foot without stopping. The most a horse can walk and run without stopping is about 40 miles per day. A human being could only have traveled by walking along a river because if you go away from a river you die because there is nothing else out there... and a human and a horse must drink water every day or they die. Even 100 people with horses and things to put water into will die if they go too far from a river because the water runs out and even if you dig into the ground for water.. you can't leave that spot to go back because you will then die after 7 days anyway from lack of food.

WHY YOU CAN'T MAKE A CANOE AND NEITHER COULD NATIVE AMERICANS... CANOES ARE MADE UP BY THE WHITES AND SO IS THE WORD CANOE

Native Americans only had stone tools to use before the Whites arrived... and the Whites found the iron mines here in America to create metal tools out of the iron later on. One can cut down a tree with a stone tool, but one cannot pick up the tree and move it once it is cut down.. and even if spending 2 years shaping that cut down log into a canoe it still will not curve and once moving it to a river once it is lightweight enough from cutting it more with a stone over and over again for about a year, it still sinks in the river, every time.

IF YOU ACTUALLY WERE BROUGHT UP WITH THE REAL WAYS OF THE NATIVE AMERICAN AND THE AUTHENTIC NATIVE AMERICAN LANGUAGES DON'T SHARE IT, NOT EVEN WITH THE INTERNET OR FRIENDS

All of the Native American languages on the Internet and in "Native American Tribes" are fake... all of the applications on the internet and application stores about Native Americans is fake. The languages are fake, the cultures shown on it are completely fake.

FAKE NATIVE AMERICAN TRIBES

* Tejon Native American Tribe

This Native American Tribe in Kern County, California is a real Native American Tribe.. however it is impossible that ****ANYONE**** lived in Kern County before the year 1905 because vehicles were not invented until the 1930s and there were no roads that went here from any point at all.. The only way to travel even on a horse is by following a river.. leave the river and you die because there is nothing out there to eat or drink except for by a flowing river. The Kern River does not connect around to any other area and up in the mountains it snows.. if it snows then no one can live there.. not even Native Americans. This proves that the Tejon Native American Tribe was formed after the 1970s. No one lived here in what became Kern County before about the year 1905. No Whites, Spanish Speaking Mexicans or Native Americans lived in Kern County until after 1905. Why ? Because it's impossible to get here even through the mountains because there are no rivers that connect to the Kern River from the other mountains.

* Mohawk Native American Tribe

* All Alaskan Native Americans Are Fake

Why ? Because it is impossible that anyone lived in Alaska before the Whites got there. As a Native American one could only live by a flowing river source to drink water every day and when it snows no one can start a fire because the snow makes everything burnable (leaves, twigs, wood) in the area wet and if it is wet it cannot be used to start a fire. If you cannot start a fire, you die.. it doesn't matter how much pelt you cover up with even in a house made of wood and bricks.

* Cherokee, Choctaw, Chippewa, Creek (Muskogee), Seminole

These Native American Tribes are all fake. There are today some people within these Native American Tribes who actually have Native American descent by blood, but they do not belong to the names of these tribes because the names of these tribes were made up by the whites. Cherokee is a mixed word and the word "Chero" is the name of a tribe from the country of India that the British supposedly murdered throughout and before the 1890s. Choctaw is also a made up word by the English speakers. Chippewa is a real Native American word, but the word comes from South America. Muskogee is a mixed English word to refer to the Native Americans that lived by the creeks and the rivers encountered by the British on the waterways by ship in Oklahoma and Tennessee that they gave musket rifles to and they gave them head gees and White made clothes to wear and they employed them to kill other Native Americans along the rivers up until the 1910s. Supposedly the British later took "Muskogee" Native Americans with them to South America to get them to try to communicate with the South American Native Americans and they also enslaved the South American Native Americans and brought them by ships to what became known as the United States as slave workers to build the towns for them. When they brought over the African slaves at a later time they used them to kill rebelling Native Americans. The Whites used them as a private army by supplying them with muskets and clothing. The English speakers called all Native Americans that they saw by the "creeks" connected to the rivers that they sailed up and down on ships as: "Creek Indians", an English phrase.

* All Blackfeet Native Americans Are Fake

Native Americans were brought to the areas of Montana after the Whites invented the technologies to get there by ship that could sail the connecting rivers and waterways into Montana (which is not where present-day Montana is at) from the Southern part of what is now known as the United States... No Native Americans ever lived in Montana because it is impossible to live there in the winter time... The Whites used the Native Americans as slaves there to build the towns in Montana... they later called them the "Blackfeet Indians" because in

the winter time when working in the snow for the U.S. Army... the feet turn black from the cold of the snow in the winter.

NATIVE AMERICAN PEOPLE GENOCIDED BY THE WHITES UP UNTIL THE 1940s IN TENNESSEE / OKLAHOMA

* MEMPHIS NATIVE AMERICANS (NATIVE AMERICANS WHO LIVED BY THE RIVER IN WHAT IS NOW KNOWN AS MEMPHIS, TENNESSEE WHERE IT IS WARM ENOUGH IN THE WINTER TIME TO SURVIVE)

(These Native Americans were genocided by Whites and were also included in the fake Native American Tribe of what is called "Chickasaw". Chickasaw is an English word that means they used saws to kill them all. Chickasaw was the name of a tool used by the Whites to kill Native Americans in Tennessee up until the 1940s While the Whites built the city of Memphis around the Native Americans who lived there)

NATIVE AMERICAN PEOPLE GENOCIDED BY THE WHITES UP UNTIL THE 1940s IN NEW YORK

* THE MOHAWK ARE ALSO A FAKE TRIBE... THE NATIVE AMERICANS WERE BROUGHT TO NEW YORK AFTER ABOUT THE YEAR 1900 AND THEY BUILT MOST OF THE THINGS THAT ARE THERE FOR THE WHITES.. THE WHITES LATER GAVE THEM THEIR OWN LANDS IN NORTHERN NEW YORK WITH WHITE MADE TECHNOLOGIES. MOHAWK IS AN ENGLISH WORD.. IT IS NOT NATIVE AMERICAN. MOHICAN IS AN ENGLISH VARIATION OF THE WORD MEHICAN... ALL NATIVE AMERICANS THAT LIVED IN MEHICA WERE MEHICANS... THIS AREA LATER BECAME KNOWN AS MEXICO OR MEHICO AFTER THE MID 1800s. IT IS IMPOSSIBLE TO LIVE IN NEW YORK IN THE WINTER TIME... THINK ABOUT IT. BEFORE ANY WHITES LIVED THERE.. NO NATIVE AMERICANS COULD HAVE LIVED THERE EITHER BECAUSE IT DROPS BELOW ZERO IN THE WINTER TIME AND THE SNOW COVERS EVERYTHING.. CAN'T START A FIRE IN THE SNOW AND NO FOOD WOULD HAVE BEEN AVAILABLE EITHER. IT IS POSSIBLE HOWEVER TO WALK FROM TENNESSEE TO NEW YORK ON FOOT IN THE SUMMER TIME AT 21 MILES PER DAY BY SOME CONNECTING RIVERS, BUT BY THE TIME YOU GET THERE YOU CAN'T WALK BACK IN THE SAME SUMMER AND YOU DIE RIGHT THERE BECAUSE IT DROPS BELOW ZERO.
